We have been actively working on our science literacy this term and studying how the sun, earth and moon function within our galaxy. We have evaluated the power of the sun and know that it is the source of all life matter on earth. We ran some experiments to test this but due to the cloud cover on the day (which has been very rare these past few months), they were all unsuccessful! If any parents have a spare moment with their children, try cooking an egg with the sun. All you need is an egg, fry pan, magnifying glass and some hot sun! Go outside and crack the egg onto a pan. Use the magnifying glass to channel the sun's rays onto the white part of the egg. It should start to cook and let me know how you go! We have moved on to explore the mechanics of the interaction of the sun, earth and moon; how this creates seasons, day and night and the lunar monthly rotation. Our "Goldilocks planet" is certainly a part of a complex and intricate galaxy which is pretty amazing and I hope you children can now explain some of this to you. During Term 4, we will continue with this unit, discovering the impact this has on our natural climatic systems and weather patterns.

WHAT'S ON AT YPS?

Term 3

September

- 12th 2024 Kindergarten transition
- 21st North Star Disco – 1:30 – 3:30
- 22nd Last day of Term 3

Term 4

October

- 9th First day of Term 4
- 10th 2024 Kindergarten transition
- 11th K-2 Excursion, Warialda:
'Aladdin and His Smartwatch'
- 16th – 20th 3-6 Canberra Excursion
- 17th 2024 Kindergarten transition
- 23rd – 27th KCS Yoga
- 24th 2024 Kindergarten transition
- 31st 2024 Kindergarten transition

**Save the date: 2023 Presentation
Day at Yetman Memorial Hall
Friday 14th December**

5 September 2023

Some items we brought in for our family history project
